Data Destruction

PRM Green Technologies Ltd. operates to a very strict code of conduct concerning the destruction of personal, private and sensitive data.

Data destruction process:

Simply deleting data or reformatting a hard disk drive does not remove the data - it can be retrieved!!!!

PRM Green Technologies Ltd. will destroy all residual data on redundant media to DOD 5220.22-M standards, thus ensuring full compliance with the Data Protection Act. The process involves multiple overwriting a specific and complicated pattern of controlled data to the media up to fifteen times. This process is slow but it works, data is eradicated FOREVER!

Non-Working hard disk drives along with hard disk drives that cannot be successfully overwritten are physically destroyed before being recycled.

Collection

Please call 0870 224 7733 to arrange your free collection now

Once we have received details of the equipment to be removed, we will arrange a mutually convenient date and time for collection, or confirm a previously arranged date.

All items for removal must be disconnected from all other ancillary equipment which is not being removed, including your local area network.

All equipment for removal must be together, in an easily accessible, ground floor location.

We will require a signature upon completion of removal.

Please note - A collection charge may apply if basic criteria is not met. Minimum number of items to qualify for free collection = 30 (not including mice, keyboards or peripherals). Please call 0870 224 7733 for further details

* Service not currently available in Northern Ireland.
